# Juan Pablo Cuellar

Android Developer

## ABOUT ME

I am an Android developer with solid experience in building native mobile applications using Kotlin. I specialize in developing efficient, scalable software with an intuitive user interface, following best architectural practices such as MVVM and Clean Architecture.

## EXPERIENCE

I am a freelance developer passionate about building mobile applications. I have worked on various personal projects to enhance and refine my skills, applying best development practices and exploring new technologies.

My focus is on continuous learning and constant improvement, developing applications that help me strengthen my knowledge and tackle new challenges every day.

## PROJECTS

### • Livestock Project

I developed a livestock management application aimed at helping small-scale farmers efficiently manage their cattle. The app allows users to keep a detailed record of their livestock inventory, track feeding schedules, vaccination history, and other key aspects of livestock management.

Repository: <https://github.com/JuanPCFdev/LivestockProjectJetpack>

### • Fruits App

I developed an application that utilizes data from a free API to provide detailed nutritional information on various fruits. Additionally, the app offers relevant details such as health benefits, origin, and consumption recommendations.

Repository: <https://github.com/JuanPCFdev/Frutas>

## Tic-tac-toe

I developed an interactive real-time multiplayer game for two players based on the classic Tic-Tac-Toe. The application allows players to connect and compete in dynamic matches, providing a smooth and engaging experience.

## Debt app

I developed an application designed to efficiently manage debts and personal finances in a simple way. The app allows users to record income, expenses, and debts, providing a clear overview of their financial status.

## EDUCATION

2024 Technology in data systematization  
Universidad Distrital Francisco Jose de caldas

2023 Introduction to version control with git  
Microsoft

## HARD SKILLS

- Shared Preferences
- Kotlin
- Jetpack Compose
- MVVM
- Clean Architecture
- ROOM
- DataStore
- KOIN
- Navigation Component
- Gson
- Retrofit
- WorkManager
- Dagger Hilt
- StateFlow
- LiveData
- Firebase
- Coroutines
- OkHttp
- JUnit + MockK

## SOFT SKILLS

- Problem-solving
- Logical thinking
- Self-taught
- Eager to learn
- Teamwork
- Empathetic
- Strong communication
- Results-driven

## LANGUAGES

- **Spanish - (Native)**
- English - (B2)
